**TITLE :**

## **Discover Your School Environment Through Instrument Making**

## INTRODUCTION

Music is an art form that uses organised sound to express moods, feelings, and emotions. It is not limited to traditional instruments because sounds can be created from many everyday objects around us. Anything that can vibrate, resonate, or make rhythmic patterns—such as bottles, boxes, or recycled materials—can become a musical instrument in your hands. You will explore your school environment to discover how everyday materials can be transformed into instruments capable of producing expressive sound.

You will collect, design, and create these instruments which will develop your creativity, collaboration, and problem-solving skills. This activity will also require you to experiment with rhythm, tone, and texture so that you can experience how sound communicates different emotional qualities. Finally, you will learn to appreciate recycling, improvisation, and hands-on music-making as you prepare to perform together as a group.

## Activity 1

### Welcome

- Listen carefully as the teacher explains about Performing arts.
- Discuss among your classmates about the importance of Performing Arts under the guidance of your teacher.
- You should listen carefully as the behaviour expected in music class is explained and make sure you understand the rules we will all follow.

## CLASSROOM RULES

No shoes allowed in the classroom.

No food or drinks allowed.

Respect your classmates and your teacher.

Keep the classroom clean and tidy.

Listen and follow instructions.

### Activity 2

#### Introduction to Music

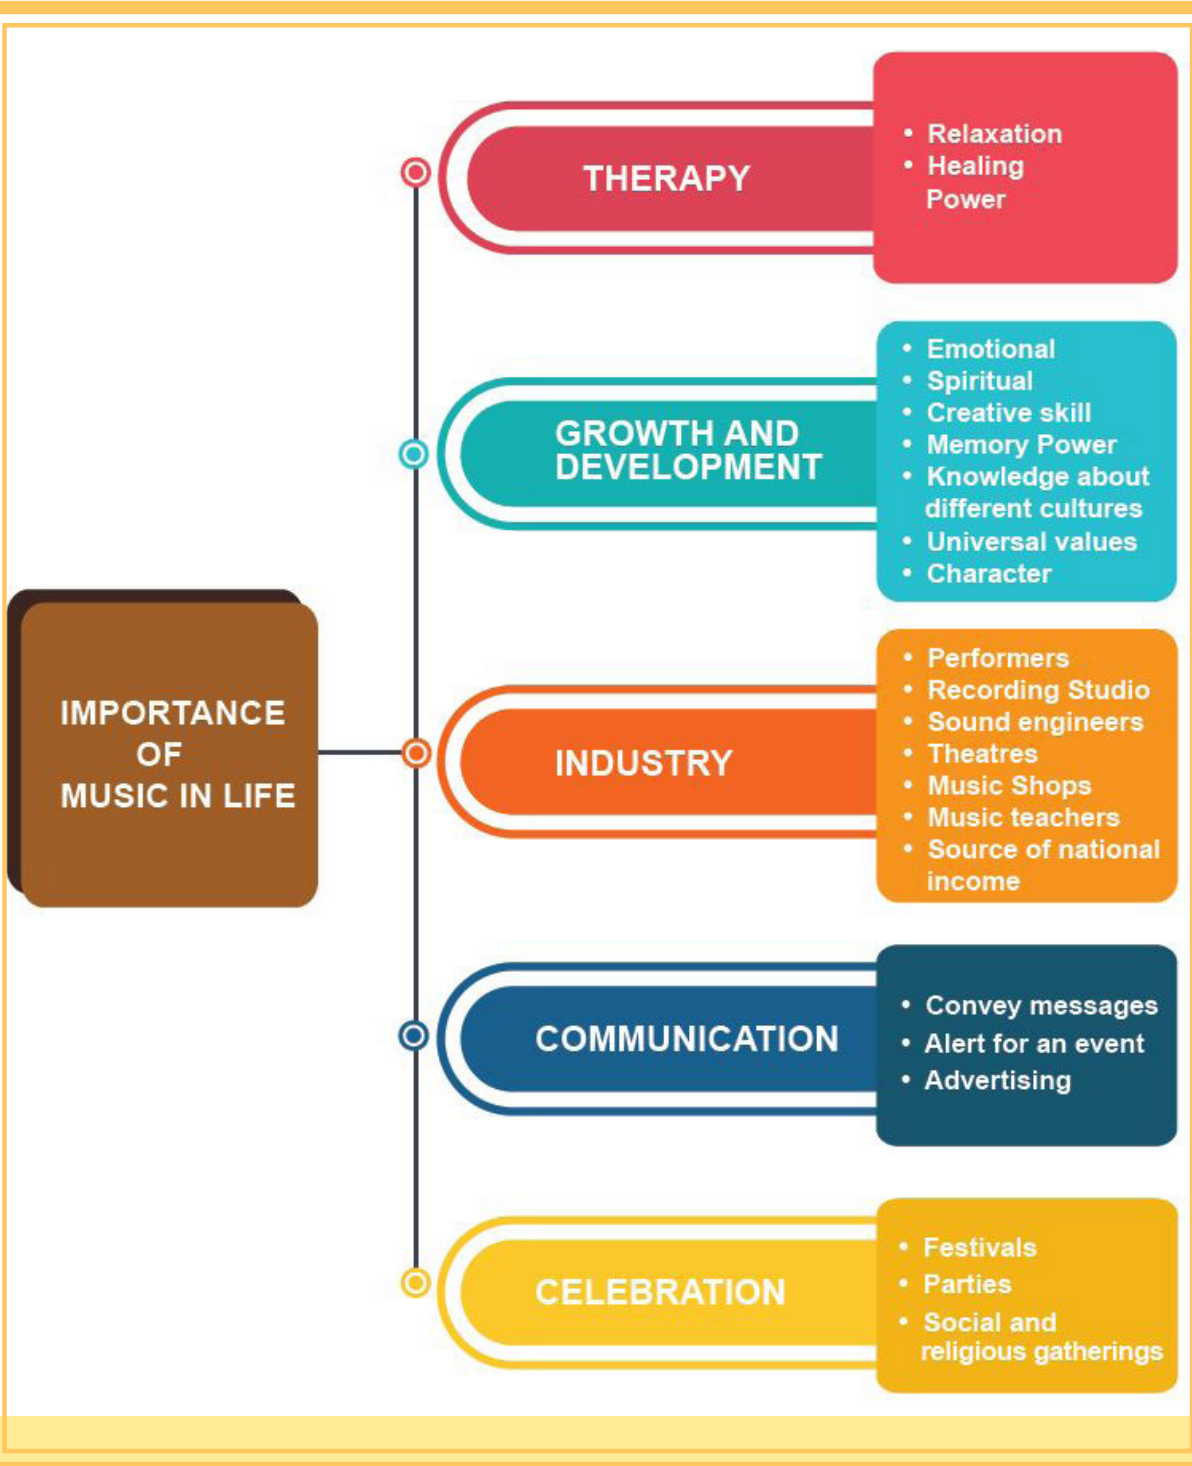

- Listen carefully as your teacher explains what music is and why it is important in our lives.

#### 1.0 INTRODUCTION:

Music is an art form through which one expresses moods, feelings and emotions by singing, playing musical instruments or dancing. It is widely practised around the world. Music and dance is always well appreciated and given a lot of importance in different cultures.

- Discuss with your classmates about the importance of music in life.

## WORKBOOK

### **Discover your school environment**

In this activity, you will explore your school environment to find safe, reusable materials that can be turned into simple musical instruments. After a short walk to collect items, you will work in groups to create shakers, beaters, wind instruments, or string instruments, decorating and assembling them using the materials you gathered. Once your instruments are ready, your group will perform a short rhythm or melody and then join the class for a collaborative performance. At the end, you will share what worked well, discuss any challenges, and reflect on how creativity, recycling, and teamwork helped you make music together.

2. Match each musical instrument name with the correct drawing that represents it

Name	Musical Instruments
Flute	
Shakers	
Beaters	
Guitar	

## WORKBOOK

### 1. Write 1-2 sentences explaining:

1. How you created your instrument?
2. What materials did you use?
3. What type of sound it produces?
4. Why do you think music is important in life?

### PROFILLING: (Tick Appropriately)

#### Lesson 1 - MY PROGRESS?

			
	Good	Satisfactory	Needs Improvement
<b>What have I Learned?</b>			
1. Classroom rules			
2. Definition of music			
3. Importance of music in life			
4. Collecting materials in the school environment			
5. Instrument Making			
6. Reflection & Expression (Sharing learning in discussion)
